

GUIDE TO USING THE WEBSITE TEMPLATE

Template Contents

The template zip file for the project website contains the following directory structure:

- *template* Rename this directory to your project name
 - *index.html*
 - *images*
 - *replace_this_image1.jpg*
 - *replace_this_image2.jpg*
 - *thumbs*
 - *replace_this_image1.jpg*
 - *replace_this_image2.jpg*
- *guide.pdf*

Website Styling

The template files do not include the CSS or JavaScript files needed for the website. You are not required to add any styling. All pages will follow the same styling and this will be applied when the page is uploaded to the <https://ixd-exhibit.uqcloud.net> site.

To ensure the styling is correctly applied when your page is uploaded, do not make any changes to the HTML or CSS structure of your template file. Follow the instructions provided for the inclusion of new elements.

Adding your Content

The content you will need to add to your page are:

- Project Name
- Team Name
- List of team members, with contact email address and key roles/responsibilities. It is recommended that you use the firstname.surname@uq variation of your email address, or a suitable personal email that will persist beyond the course.
- List of keywords related to the project.
- List of user-centered Design Methods used in the design process.
- List of technology has been used to implement the project.
- Description of concept and intended experience, with images.
- Explainer video – 3 – 5 minutes that helps in communicating the concept and desired experience. This video will be further added to in the case of a virtual exhibit with live video demonstrations of interaction with the final product. Upload the completed video & copy the embed code into the frame supplied.
- Description of technical development & construction, with images.
- Final statement, following exhibit, describing exhibit experience & public response.

The HTML contains placeholders for each of the content items above. All you need to do is insert the required content in the position in the HTML. The HTML file is commented heavily to show you where to place content.

Images

- All images relating to your project should be placed into the **images** directory.
- You can include as many images as you like as long as they are relevant.
- Images **must be optimized** for web viewing to fit 1024 or 2048 pixels. No single image is to be larger than 1Mb (and should be smaller than that!).
- Please create thumbnails for your images. When doing so, keep in mind the CSS frame is set to 450px x 450px and 236px x 236px.

- Place thumbnails into the **thumbs** directory.
- All images must have a suitable caption and descriptive alt text.
- There are 2 **div** elements allocated as image galleries – one with ID **concept_desc** for images related to concept imagery and another with ID **technical_desc** for images related to the technical development.
- The first image, in the **concept_desc** gallery will be used as a feature image for the project on the landing page for the exhibit.
